		Collaboration Company	–

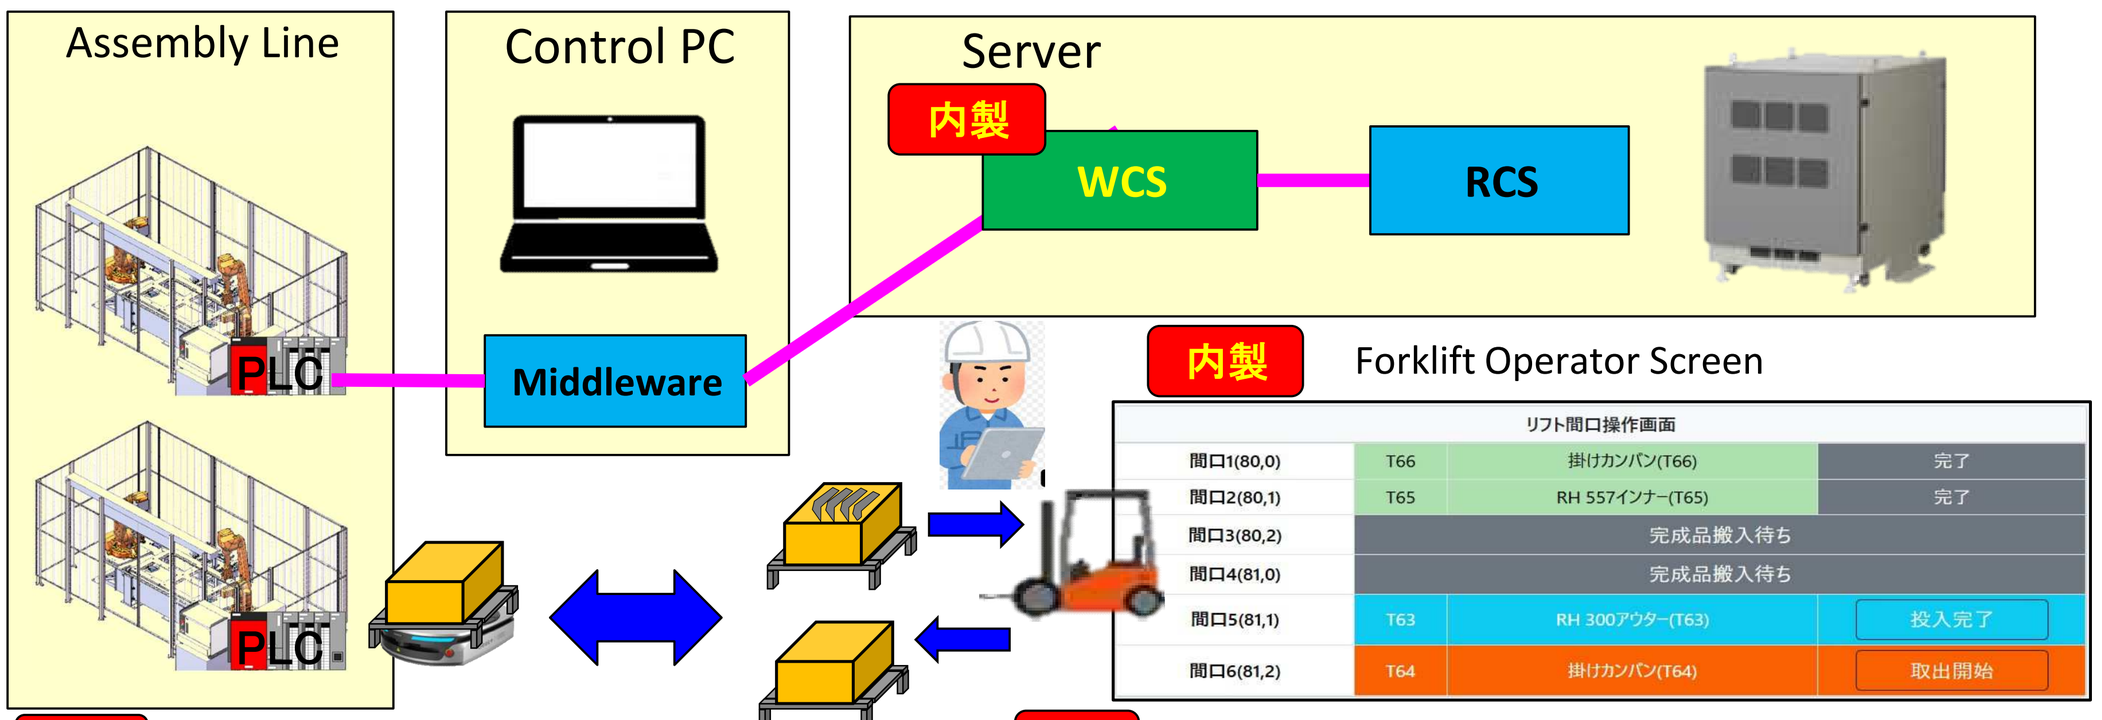

Automation / Labor Saving / Cost Reduction

Logistics Automation

Theme	In-house Capability Development for AMR Systems
Issue	Build in-house capability at each plant for AMR deployment, operation, and continuous improvement.
Counter measure	Enable each plant to acquire know-how through the deployment of an in-house parts transportation system.

Over view

In-house Parts Transportation System

- Reduced Development Costs Through In-house Development
  Estimated: JPY 15 Million
- Layout Changes and Additions Can Be Implemented In-house

AMR Dojo

AMR Operation and Maintenance Training
IT Skills Training
（Programming & Databases）

Improvement Items

Developed by Chiryu Plant
【AMR Activity Monitor】、【System Stopped】
Ability to Retrieve Data from Databases and Develop User Interfaces

Good Point	Reduced Development Costs and Self-Sustaining Continuous Improvement Through In-house Development		
Future Plans	Expand and Strengthen IT Skills Across Plants Develop a Vendor-independent AMR Platform Compatible with Multiple AMR Models	**Target**	–
		Inplementation Timing	2027年10月

Date of Creation : 10/27/2026
